Antitrust Policy Notice

- › Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.
- › Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrave of the firm of Gesmer Updegrave LLP, which provides legal counsel to the Linux Foundation.

Agenda

- Roll call
- Project Update
- Specification (*Mark Gisi*)
- Onboarding (*Nathan Kumagai*)

Project Update

- Latest newsletter now out:

<https://www.openchainproject.org/openchain-newsletter-issue-8>

- Japanese Study Group meeting on the 27th December at Sony HQ

- Great new one-pager to explain the project:

<https://www.openchainproject.org/news/2017/11/29/the-benefits-of-the-openchain-project-in-one-page>

BENEFITS OF ADOPTING OPENCHAIN

1 OpenChain makes Free and Open-Source Software (FOSS) more accessible to your developers

OpenChain provides a framework for shared, compliant use of FOSS. Conforming companies create an environment that supports use of FOSS internally and sharing of FOSS with partners.

2 OpenChain reduces overall compliance effort, saving time and legal and engineering resources

OpenChain allows companies in a supply chain to work together toward FOSS compliance and provides a consistent standard to which all must perform. By contrast, in a typical supply chain, each member of the chain has to perform FOSS compliance for software of others in the chain, wasting time and resources in a duplication of effort.

3 OpenChain may be adapted to your existing systems

OpenChain allows you to choose your own processes to meet its requirements. OpenChain provides resources that help you design new processes from the ground up, or you may choose to use the systems you have in place.

4 OpenChain helps your business teams work together toward a common goal

OpenChain provides a blueprint for your legal, engineering and business teams to work together toward FOSS compliance.

5 OpenChain allows you to conform to a stable, community-backed specification

When you adopt OpenChain, you conform to a stable specification that is widely backed by industry and community participants. OpenChain was developed in an open, collaborative process, with contributors from a wide range of industries across Asia, Europe and North America. OpenChain is being formally adopted by a growing number of both small and larger companies.

SUPPORTING YOUR ENTIRE TEAM:

Legal & Compliance

- Establishes one standard for all members in the supply chain
- Increases license compliance and awareness across the supply chain
- Provides resources to educate vendors, suppliers and other partners on FOSS compliance

Procurement

- Simplifies vendor standards in contracting
- Provides a stable, widely supported specification

Executive Team

- Reduces overall compliance costs and risks
- Provides a blueprint for cooperation between internal teams

Software Development

- Makes FOSS more accessible to engineering teams
- Reduces overall engineering time in legal diligence
- Allows you to design processes to fit your developer culture

Sales and Marketing

- Helps you build trust among your customers
- Reduces business, legal and reputational risks
- Offers access to OpenChain branding
